A state-of-the-art post-production facility situated within ORIGO Studios Budapest complex

FULL-SERVICE POST HOUSE

ORIGO DIGITAL

A state-of-the-art post-production facility

ON-SET DAILIES, EDITING AND STORAGE

A state-of-the-art post-production facility situated within ORIGO Studios Budapest complex. Here we offer clients 16mm and 35mm negative processing, 2K and 4K dailies and final finishing support for feature films, television and commercial projects.

DEDICATED NETWORK

Our complex features include a high-speed dedicated network with expendable bandwidth that can transport your project, no matter the size, rapidly to any location around the world. And regardless of whether you require remote color correction or studio approval, we have developed workflows that will satisfy your most demanding production needs.

24/7 STAFF

A highly qualified staff of post-production professionals will also be on hand 24 hours a day to support and manage your video, data and film production needs.

SCREENING AND COLORIST ROOMS

Two large screening rooms capable of 35mm, 2K/4K data and video projection for cast, crew and special engagements are also available. And with two digital intermediate suites, finishing your project has never been easier.

Head of Post House

László Hargittai (“Pamacs”), the head of ORIGO studios’ post-production department, Origo Digital Film, received one of the most prestigious Hungarian film awards, the Béla Balázs Award

Film scanning

DFT SCANITY (35mm, vista Vision)

DTF Scanity offers unparalleled speed and quality. It serves a variety of scanning applications and provides touch-free pin registration to ensure excellent image steadiness.

ARRISCAN XT (16, 35mm)

ARRI's ALEXA XT sensor gives the ARRISCAN XT the best image quality for archive film. Its diffuse, high-power LED illumination reduces the visibility of scratches without producing any heat.

Editing

A comprehensive editing environment equipped with Avid Media Composer Suites and DaVinci Resolve Studio Suites. The facility features shared storage for efficient project management and collaboration. Editors can take advantage of configurable edit bays tailored to their specific needs. For high-quality finishing, Origo Studios provides online editing, conforming with Clipster and Resolve systems, ensuring a seamless post-production workflow.

Full dailies services

Our services include full dailies preparation with sound sync and dailies grading with LUT application. We handle metadata filling, screeners, and editorial exports, along with Avid bin creation. For secure storage, we provide LTO archiving (LTO-6, LTO-7, LTO-9) and thorough quality control (QC). Screeners can be uploaded to platforms like PIX, FrameIO, and Copra, as well as to Media Shuttle. You can also facilitate dailies screenings in our theater.

Digital Color Grading

Top-tier digital color grading services, featuring a cinema grading room equipped with Barco studio edition projectors and a broadcast grading room with a calibrated OLED display. We offer Flanders Scientific color control and DaVinci Resolve systems to ensure precise and high-quality color correction. The studio is Truelight certified, guaranteeing industry-standard color accuracy for all projects.

Audio Post

Scaleable system of Pro-Tools based digital audio workstations seamlessly integrating with picture editorial and dailies preparation. Post services include audio mixing, dialogue replacement (ADR) / dubbing / voice-over recording, foley, audio restoration

Data Hosting & High-speed data sharing

High content safety with advanced data storage solutions, utilizing Isilon and Qumulo systems. We offer Signiant Media Shuttle services for secure and efficient file transfers. The studio is licensed for security by major industry players including Disney, Marvel, Netflix, Amazon, and Sony, guaranteeing top-tier protection and compliance for all hosted data.

Deliverables

A wide range of deliverables to meet various media needs. We offer DCP creation with KDM for secure theatrical distribution, CMD creation, and broadcast file creation. The studio also provides IMF creation for standardized media packaging and frame rate conversion for both cinema and broadcast purposes. Additionally, we offer full digital archive package creation, ensuring comprehensive and secure media storage.
